GRADED SCHOOL BUILDING AND ST. ANNE'S IN ASHES.

Fire Starts in the Former and is Fanned by the Gale Beyond Control-Barns of Miss Mary L. Ward Destroyed Also - Loss Fully \$10,000; Partially Insured.

MILTON, Jan. 18. - At 8:30 this morning the graded school building of this village was discovered on fire. The fire was first seen in the cupola, and is supposed to have caught from a defective chimney.

The janitor had built the fire in the furnace a short time before, and left the building. The school house was a wooden structare, and with no means at hands and a strong outh wind, was soon a mass of flames.

Fire was soon communicated to St. Anne's atholic church, which stood near by. The hurch was a brick structure, the fire catching in the cornice, and it was soon ablaze. The sparks were blown across the road and the barns of Miss Mary L. Ward, occupied

y C. S. Ashley, were soon on fire. Nothing in the school house was saved in the upper story and the furniture of the church was a total loss

The barns of C. S. Ashley were filled with hay and a few farming implements which Crew of the Gloucester schooner Maggie were saved. Several dwelling houses, which E. Wells was brought into port at Halifax. stood in close vicinity to the burning build-

ings, were saved only by hard work.

The buildings were all insured, but the total loss will reach \$10,000. The insurance is as follows: On school house, \$2000, in the ermont Mutual: on church, \$2500, and on

The loss is a severe one for Milton, as St. Wobarn (Mass.) sewer commissioners ask Anne's congregation is poor and there is no other building in the village suitable for school purposes. A new school building will that the Italian aristocracy is in-triguing against Premier Crispi in will probably not be rebailt until late in the

Deafness is caused by an inflamed condition of the mucous lining of the Eustacham Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restered to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by entarrh, which is nothing but an inflamed condition of the nucleus stirfaces.
